## We Want You!

### MILCOM 2003

Downtown Boston

**Distinguished Speakers**

- VADM Arthur K. Cebrowski (R)
- Lt. Gen. James R. Clapper (R)
- ADM Edmund Giambastiani
- General William R. Looney III
- Honorable Peter Zeitz

**Dynamic Panels and Tutorials**

- Transformation to Net-Centric Infrastructure
- Software Defined Modules
- Transformational Vision for C3I
- Free-Space Laser Communications
- Ultra-Wideband Communications
- And More

MILCOM 2003 will feature the most respected names in military communications and include over 200 classified and unclassified presentations selected from over 700 submissions.

Distinguished speakers, dynamic panel discussions led by recognized moderators, and over 100 exhibits will complement a superb technical program.

Join us in historic downtown Boston, Massachusetts on October 13-16, 2003 for this revolutionary event.

For more information visit our web site at [www.MILCOM.org](http://www.MILCOM.org).

**Transformation: Power to the Edge**

Co-located by:

- GENERAL DYNAMICS
- MITRE

Sponsored by:

- IEEE

MILCOM2003

## TRANSFORMING YOUR VISION INTO REALITY

Dressed in chameleon-like body armor, the warrior of the future will be a reflection of the environment.

Armed with a transparent network that is secure, flexible, scalable and survivable, a single warrior will be transformed into an Army of one.

## TRANSFORMING YOUR VISION INTO REALITY

The future will be filled with complex communication possibilities. The successful engineer will require vision and expertise.

**GENERAL DYNAMICS**  
Communication Systems

Strength through Communications

## TRANSFORMING YOUR VISION INTO REALITY

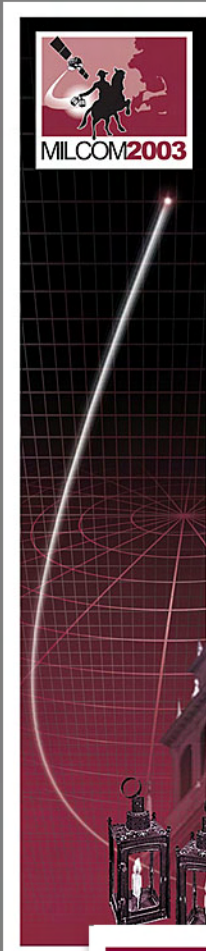

As the designer of the most sophisticated communication systems ever built, we have the technology and ability necessary to meet your needs and objectives. We know our research, combined with a thorough understanding of C3I equipment, will allow us to provide you with the best network.

**SVG**  
SVG from Quality Graphics on the Web! New vector graphics file format for XML

SVG (Scalable Vector Graphics) is a new XML-based language for web graphics. SVG allows the display of any font, color gradients, animation, and filter effects, all at vector resolution and has a smaller file size to boot! READ ALL ABOUT IT

**articles of interest**  
Web Graphic Design: It's Not What You Think by Kim Brown & Curt Degenhart for WEBREVIEW.COM

ARCHIVE NEWS STORY - This article discusses the merits of Graphic Design and Web Design in relation to their impact on the web user. Lecturer, usability expert, Jared Spool, has some very interesting observations. "...graphics neither impair nor improve the users' success in finding information... download times don't matter either".

Web Design is Not Dead by Jennifer Niederst for WEBREVIEW.COM

ARCHIVE NEWS STORY - This article features an interview with Howired's Jeffrey Veon. Veon categorizes most sites as either "library" sites or "gallery" sites with clear navigation to information as being the key to successful sites. Veon warns that "...experimentation [live testing] mat alienate users."

"Sharing information is Hot" by Susan Kuchinkas at WEBREVIEW.COM

Robust technical pages have been created to provide you with the information you need to know. File format conversions from Mac to PC, do 3 extensions to identify obscure files from clients, facts about software application support for graphic formats and many other useful topics. We will show you how to use almost any Mac
